

**For over three decades, Linde Process Plants, Inc. (LPP)
has provided SOLUTIONS to the natural gas processing industry.**

EXPERIENCE

LPP is a company with over 30 years experience in natural gas processing (prior to 2002 projects were completed under the name *The Pro-Quip Corporation*). As a subsidiary of The Linde Group, we are a totally integrated engineering, fabrication, and construction company. LPP has successfully completed more than 100 gas processing plants worldwide. The inlet gas capacities of these modularized and modular/stick built combination plants have ranged from 10 to 350 MMSCFD.

ADVANTAGES

We provide our clients with a complete single-source SOLUTION, including process design, detail design, equipment and materials procurement, shop fabrication, construction services, and commissioning and startup.

- Over 30 Years of Experience
- Proven Technologies
- Modular Construction
- Reduced Capital Cost
- Flexible Schedules
- ISO 9001 Certified
- Single-source SOLUTION

TECHNOLOGY

LPP utilizes proven licensed technology to meet the gas processing requirements of today and tomorrow. Our engineering staff can provide various technologies to achieve the best overall solution while meeting the client's specific needs. Some of the areas that can be analyzed by our multi-discipline engineering and design staff include:

- Overall NGL Production
- LNG Peak Shaving
- Ethane Recovery
- NGL Product Treating
- Hydrocarbon Dew Point Control
- Sulfur Recovery
- NGL Product Fractionation
- Plot Optimization
- Nitrogen Rejection
- NGL Product Storage
- Capital/Operating Cost Reduction
- Gas Treating
- Compression Requirements
- Schedule Optimization
